Software Developer

Innovative Software Engineer with 1+ years of experience in front-end and back-end development. Skilled at implementing automation and efficiency solutions to recover lost funding and optimize operations. Focused on solving complex problems with a results-driven approach, while fostering clear communication and collaboration to maximize team efficiency and growth.

SKILLS

Technical: ASP.NET Core, AWS, C#, C++, CI/CD, Data Structures, Git, Java, Microsoft Azure, NumPy, Object Orientated Programming, OOP, pandas, pytest, Python, SQL

Soft Skills: Agile Development, Analytical Thinking, Forward Planning, Problem Solving, Project Management, Stakeholder Communication, Team Coordination

Finance: Algorithmic Trading, Automation, Portfolio Analytics, Price Projection, Risk Management, Stock Comparison

WORK EXPERIENCE

Anglo Skills College • Nottingham City, England, United Kingdom • 01/2024 - Present

Information Technology Administrator

- Implemented **digital attendance system** using Power Automate, Jotform, JavaScript, and Excel – achieving **78% adoption** and reducing manual tracking by **10+ hours/week**.
- Deployed **automated Attendance Tracker**, improving reporting accuracy by **40%** and enabling real-time monitoring for 200+ students.
- Managed a small team (4 people), overseeing task delegation, communication, and on-time project delivery.
- Administered **Microsoft Azure** accounts and maintained the **Virtual Learning Environment (VLE)** for 200+ students and staff, ensuring **100% uptime**.

EDUCATION

Bachelor of Science - BSc (Hons) in Computer Games and Programming Skills

De Montfort University • Leicester • GPA: 2.1 • 01/2020 - 01/2023

- Using C++ and industry-standard frameworks, applying graphics, physics, and AI programming.
- Gained experience in **OOP, algorithms, debugging, and performance optimization**.
- Collaborated on group projects using **Agile methods and Git version control**.
- Applied **problem-solving and creative design** to meet project requirements and enhance user experience.

BTEC in Information Technology & Applied Science

Bluecoat Sixth Form • Nottingham • GPA: Merit, Merit, Merit, Merit • 01/2018 - 01/2020

PROJECTS

Stock Tracker Project • 09/2025 - 10/2025

- **Developed a Stock Tracker application in Python** with a Tkinter GUI, integrating **yfinance for live market data**, **pandas for financial analysis**, and **matplotlib for portfolio visualization**.
- **Implemented backtesting functionality** allowing users to simulate investment strategies by entering monthly contributions across assets (e.g., AAPL, ^GSPC, GLD).

- **Built interactive features** including editable investment tables, graphical portfolio growth tracking, and **Excel export for reporting**.
- **Applied version control with Git/GitHub**, improving project modularity, collaboration potential, and maintainability.

Algorithmic Trading Bot (Python Personal Project) • 10/2025 - Present

- **Developed and optimized** a proprietary trading strategy over 12 months, transforming it into a fully automated bot using **Python** and **yFinance**.
- **Backtested** on **Gold (XAUUSD)** and **USDJPY** with six months of data, achieving growth from **£100 to £622.62**, recording **1,425 trades** with detailed analytics on win/loss and performance metrics.
- **Iteratively improved** through 10+ versions, refining position sizing, entry logic, and compounding functions until profitability was achieved.
- Implemented automated **data collection, risk management, and trade logging** into CSV for further analysis and optimization.
- Next step: **forward testing** the bot in a live or demo environment to validate performance consistency.
